

FIVE STEPS TO IMPROVE YOUR ESG PERFORMANCE

2025 EDITION

ESG IN FOCUS FOR 2025

MORE THAN JUST A BOX TO TICK

ESG is a non-negotiable in 2025. Investors, regulators, and customers are increasingly prioritising sustainability when making decisions, and South African companies are taking note.

“

29% of South African companies report on sustainability because investors or financial backers want information on sustainability.

Source: Alexforbes Survey

Modern investors are choosing where to put their money based on ESG performance. Companies that ignore this shift risk losing credibility, market share, and access to capital.

Transparent reporting, measurable ESG outcomes, and a clear sustainability strategy are expected. Companies that act now can turn ESG into a competitive advantage, while those that delay face regulatory, reputational, and financial risks.

“

Companies are being encouraged to integrate robust ESG and Sustainable Development policies into their operations to gain a competitive advantage.

THE PROCESS

OUR SUSTAINABILITY JOURNEY TO ESG COMPLIANCE

No matter which Pandae service you choose, we follow a rigorous 5-step process to ensure your waste is managed responsibly and compliantly:

MANAGE & SORT

We guide the management of your waste streams, providing sorting equipment and trained personnel to handle hazardous and non-hazardous waste safely.

CLICK TO COLLECT

Your appointed sorter or admin delegate places a collection order with our approved recyclers and waste removal partners via Pandae's App.

TRACK & RECORD

Each collection is digitally recorded, with live data stored on our Business Intelligence Platform. Collection notes and compliance records are instantly accessible.

ANALYSE DATA

Access environmental reports, analyse waste volumes, and gain operational visibility via a comprehensive dashboard powered by accurate, actionable data.

ENSURE COMPLIANCE

Our network of hazardous waste and environmental experts ensures that all waste streams are safely transported, disposed of, and recorded in accordance with regulations.

IMPROVE YOUR ESG TODAY

SERVICES

COMPREHENSIVE WASTE MANAGEMENT SERVICES

Pandae offers a full suite of services to support your ESG goals and simplify compliance across all waste streams.

SERVICE BENEFITS

- Dispose of waste in an environmentally friendly manner
- Reduce the risk of environmental fines and penalties
- Drive tangible business results today and in the low-carbon future
- Optimise waste receptacles to eliminate unnecessary fees and services
- Access accurate information and actionable data
- Achieve your landfill diversion goals on time and under budget
